SPORTS BOSBERAAD UNITES COMMUNITY

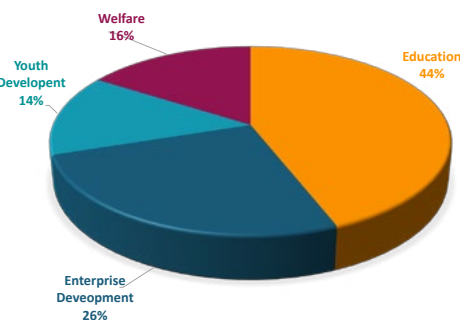

We recently hosted a dynamic Primary School Sports Bosberaad, which brought together a group of stakeholders committed to shaping the future of school sports in our community.

A number of sports associations delivered insightful presentations on their respective codes, providing participants with a comprehensive understanding of the current sports landscape and identifying potential areas for improvement.

The Bosberaad concluded with the planning of the Primary School Sports Lekgotla scheduled for later this year.

"We have been afforded the opportunity to create a sustainable foundation for sports development within our municipality. I strongly believe that the plans we have put forward will ensure that our children are developed holistically." - Thato Leeuw, Chairperson Dr. RS Regional Cricket Chairperson.

SPECIAL NEEDS WORKSHOP EMPOWERS PARENTS

In collaboration with Autism South Africa, we recently hosted a highly successful Autism Awareness Workshop at the Waterloo SMME Incubation Hub. Specifically tailored for parents of children on the autistic spectrum, this event delivered an engaging and informative session.

The workshop witnessed a remarkable turnout, showcasing the growing interest and need for such initiatives within the community. The session featured a variety of practical activities designed to enhance communication skills, implement sensory integration techniques, and foster positive behavioural support.

"We appreciate the effort that Waterloo Solar has put in by organising this workshop so that as parents we can be equipped in helping our children with autism."

- Dr. Mvula, a participating parent.
